AECOM to provide flood-control, other infrastructure solutions to Jeddah, Saudi Arabia, under US\$171-million work order contract

LOS ANGELES (May 11, 2011) — AECOM Technology Corporation (NYSE: ACM), a leading provider of professional technical and management support services for government and commercial clients around the world, announced today that it was awarded a substantial work order for project management services that include a consultancy, engineering, and construction services contract for a citywide storm water, flood-control, and wastewater infrastructure improvement program in Jeddah, Saudi Arabia.

Under the contract, which is worth approximately US\$171 million, AECOM will offer all consultancy services for the management of the program, from the preliminary engineering works to the supervision of the emergency and long-term solutions against natural disasters, especially flooding.

“We are very excited to play the lead role in support of Jeddah’s infrastructure improvement plan,” said AECOM President and Chief Executive Officer John M. Dionisio. “This flood-control and wastewater program will enhance the quality of life for the city’s approximately 3.2 million residents.”

The tasks to be undertaken by AECOM include implementation of dams and other flood control barriers; constructing drainage canals and storm water reservoirs; resolving Jeddah’s most vulnerable flood points; preparing comprehensive studies for undeveloped areas, including environmental plans for the entire Jeddah governorate; implementing comprehensive infrastructure improvements to solve the sewerage problems in Jeddah; and establishing a disaster-management center for Makkah Province.

The program will be executed over the course of several years with the completion of the flood control improvements scheduled for 2013.

AECOM was selected from among 11 international firms competing for the program.

About AECOM

AECOM is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental, energy, water and government. With approximately 45,000 employees around the world, AECOM is a leader in all of the key markets that it serves. AECOM provides a blend of global reach, local knowledge, innovation and technical excellence in delivering solutions that create, enhance and sustain the world’s built, natural, and social environments. A *Fortune 500* company, AECOM serves clients in approximately 125 countries and had revenue of \$7.3 billion during the 12 months ended March 31, 2011. More information on AECOM and its services can be found at www.aecom.com.
